

ASSIGNMENT 1

- **BAR CHART:**

- **Purpose:** This chart compares sales across different product lines. It helps understand which product categories generate more revenue and which generate less.

- **Step by step process:**

- Open Tableau Public/Desktop and load your dataset.
- Open New Worksheet
- Drag **Product line** → to Columns, Drag **Total** → to Rows
- Make sure it shows SUM(Total).
- Go to Show Me → Click **Bar Chart**, (Or select Bar in Marks card)
- Double-click the title and rename it: **TOTAL SALES BY PRODUCT**

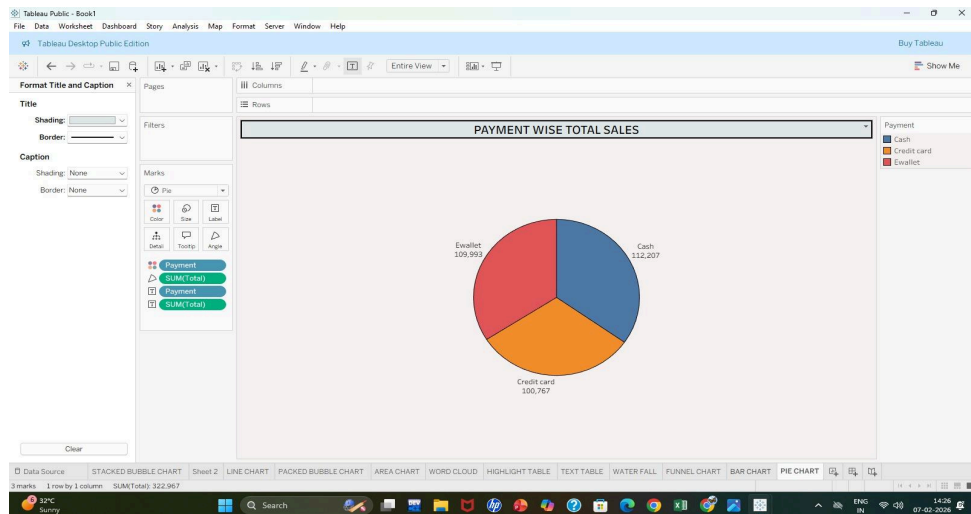

- **PIE CHART:**

- **Purpose :** This chart shows the total sales based on different payment methods like Cash, Credit Card, and E-wallet. It helps understand which payment method is used the most and contributes more to total sales.

- **Step by step process:**

- Open Tableau Public/Desktop and load your dataset.
- Click on a new Sheet.
- Drag Payment → to Marks (Color).
- Drag Total → to Angle.
- Select **Pie Chart** ,In Marks card → choose **Pie**
- Drag Total → to Label (if needed).
- Double-click the title and rename it: **PAYMENT WISE TOTAL SALES**

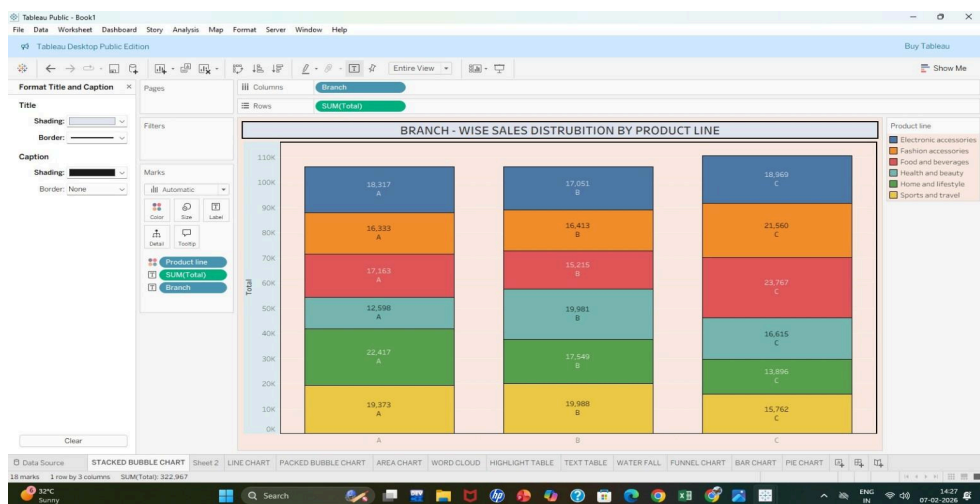

- **STACKED BAR CHART:**

- **Purpose:** This chart compares total sales of each branch by breaking them into different product lines. It helps identify which branch performs better overall and which product categories contribute most to each branch's sales.

- **Step by step process:**

- Open Tableau and connect to your dataset.
- Click on a new worksheet.
- Drag **Branch** → to Columns , Drag **Total** → to Rows (ensure it shows SUM(Total)).
- Drag Product line → to Color in the Marks card to create **stacked bars**.
- Drag Total → to Label.
- Rename the title to **BRANCH-WISE SALES DISTRIBUTION BY PRODUCT LINE**.

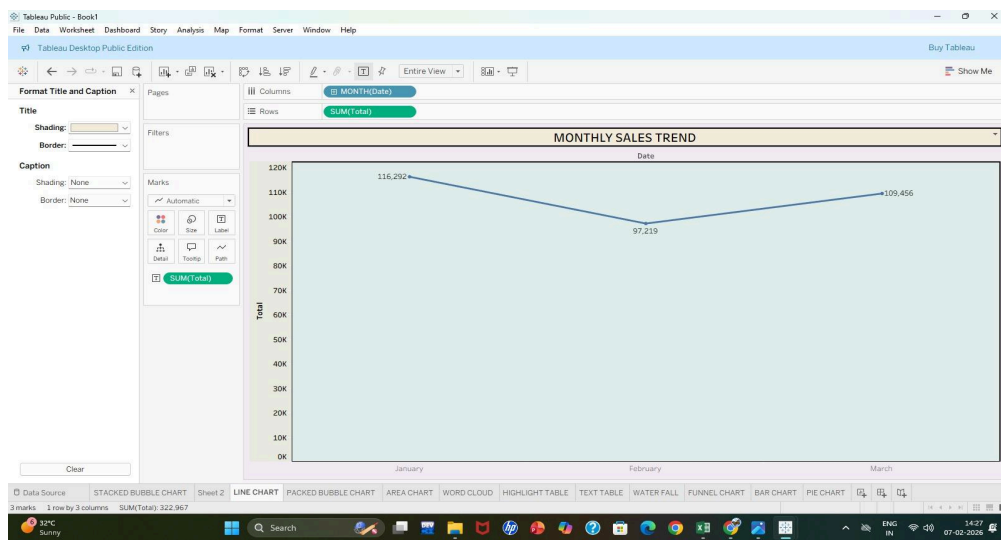

- **LINE CHART:**

- **Purpose:** This chart shows the sales trend over different months. It helps understand whether sales are increasing, decreasing, or fluctuating over time.

- **Step by step process:**

- Open Tableau Public/Desktop and load your dataset.
- Click on a new sheet.
- Drag **Date** → to Columns , Change it to MONTH(Date) if needed.
- Drag **Total** → to Rows (ensure it shows SUM(Total)).
- In the Marks card → choose **Line** OR click Show Me → **Line Chart**.
- Drag Total → to Label (optional).
- Rename the title to: **MONTHLY SALES TREND**

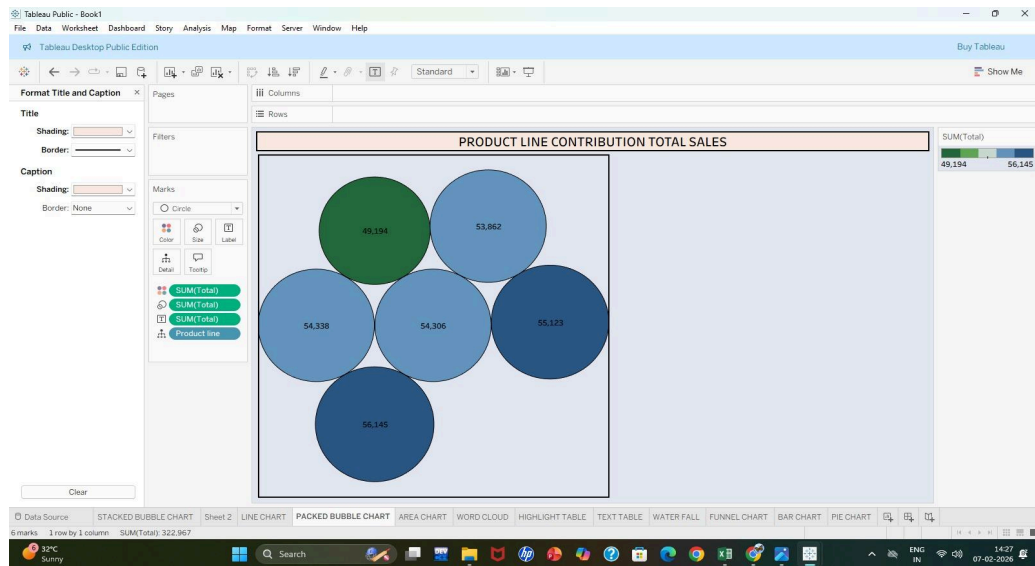

- **PACKED BUBBLE CHART:**

- **Purpose:** This chart shows the contribution of each product line to the total sales. It helps identify which product category contributes more and which contributes less to overall revenue.

- **Step by step process:**

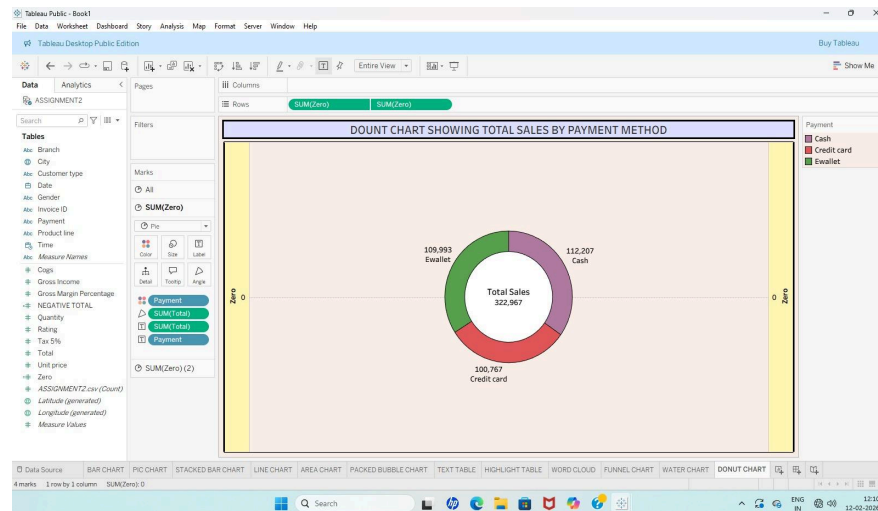

- Open Tableau Public/Desktop and load your dataset.
- Click on a new sheet.
- Go to Show Me → Click **Packed Bubble Chart**.
- Drag **Product line** → to Color (Marks card).
- Drag **Total** → to Size and Label (Ensure it shows SUM(Total)).
- Double-click the title and rename it: **PRODUCT LINE CONTRIBUTION TOTAL SALES**

ASSIGNMENT 2

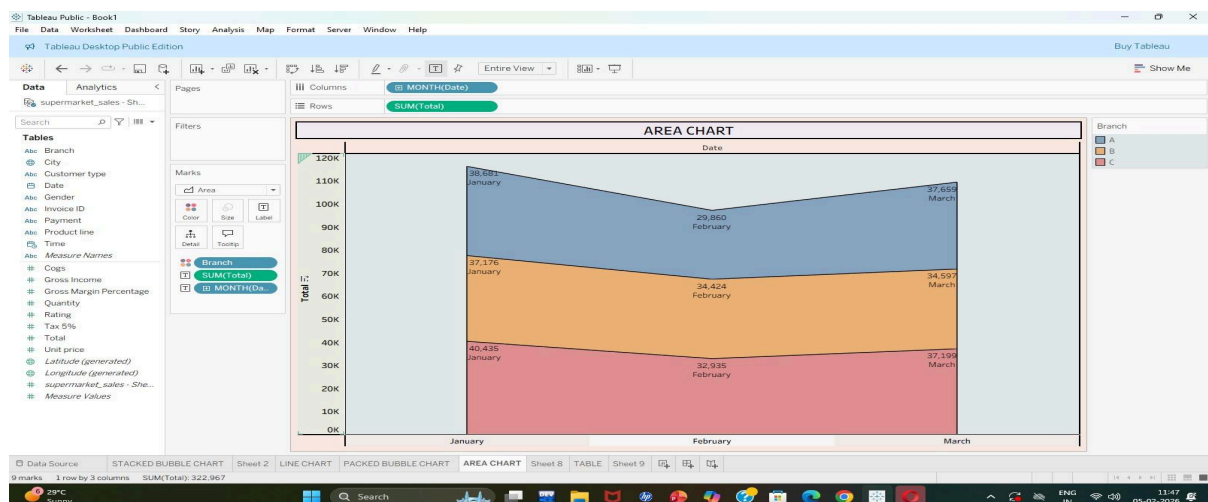

DONUT CHART:

- **Purpose:** This donut chart shows the total sales distribution by different payment methods. It helps identify which payment method contributes the most and least to overall sales.
- **Step by step process:**
 - Open Tableau and load your dataset.
 - Right-click in Data pane → Create Calculated Field → Name it Zero → Type 0 → Click OK.
 - Drag SUM(Zero) → to Rows twice.
 - Right-click second axis → Select Dual Axis.
 - Create Outer Pie : In first Marks card → Select Pie.
 - Drag Payment → to Color , Drag Total → to Angle and Label.
 - Create Inner Circle : Click the second Marks card → Select Pie.
 - Remove Payment and Reduce Size to make a hole (donut shape).
 - Rename the title to: DONUT CHART SHOWING TOTAL SALES BY PAYMENT METHOD

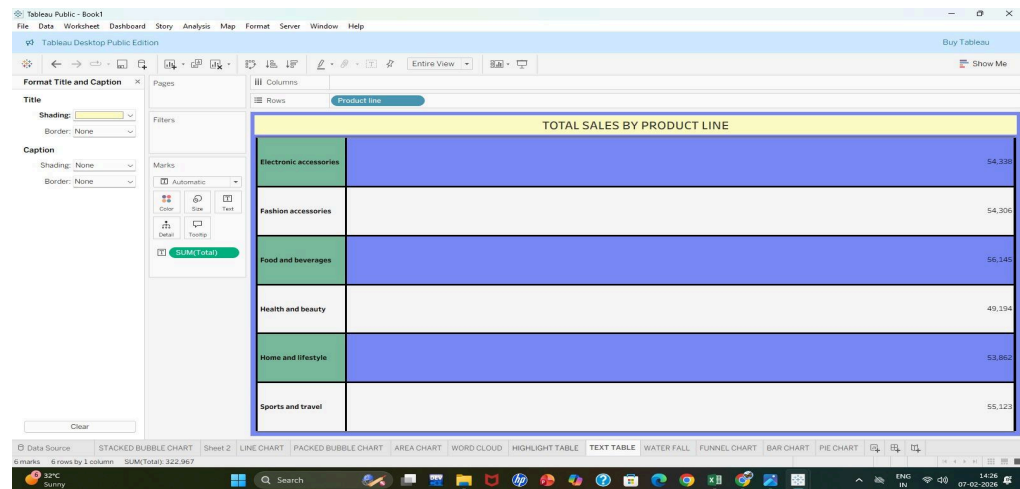

AREA CHART:

- **Purpose:** This area chart shows the monthly sales trend for each branch. It helps compare branch performance over time and understand overall sales growth or decline.
- **Step by step process:**
 - Open Tableau and load your dataset.
 - Click on a new sheet.
 - Drag Date → to Columns. Change it to MONTH(Date).
 - Drag Total → to Rows (ensure it shows SUM(Total)).
 - In the Marks card → choose Area OR go to Show Me → Area Chart.
 - Drag Branch → to Color (to create stacked areas).
 - Rename the title to AREA CHART or BRANCH-WISE MONTHLY SALES TREND.

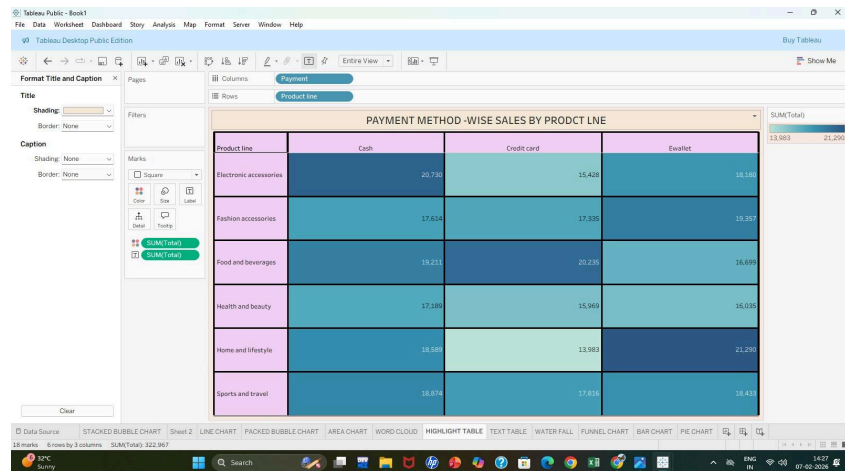

TEXT TABLE:

- **Purpose:** This text table shows the total sales for each product line in a clear tabular format. It helps quickly view and compare exact sales values for all product categories.
- **Step by step process:**
 - Open Tableau and load your dataset. Click on a new sheet.
 - Drag Product line → to Rows. Drag Total → to Text in the Marks card (Ensure it shows SUM(Total)).
 - Go to Show Me → Click Text Table.
 - Rename the title to: TOTAL SALES BY PRODUCT LINE

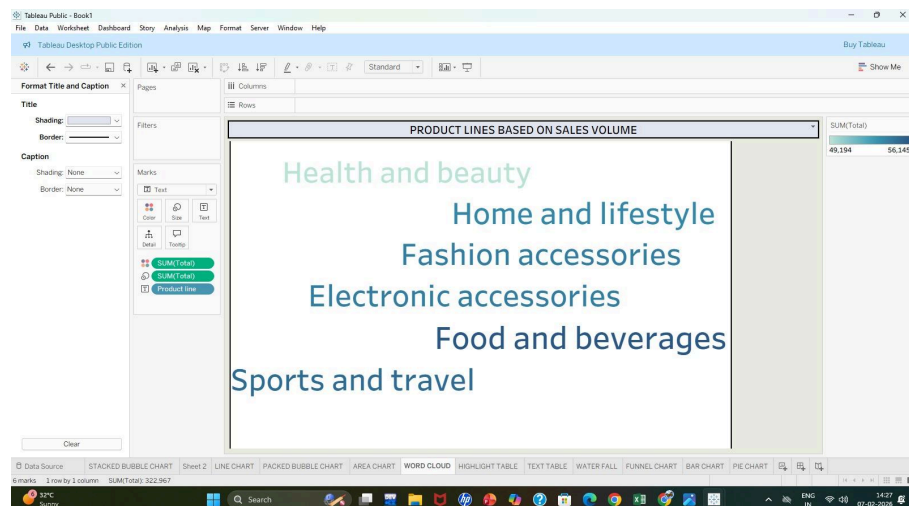

HIGHLIGHT TABLE :

- **purpose:** This highlight table shows sales for each product line based on different payment methods. It helps quickly identify which payment method generates higher or lower sales using color intensity.
- **Step by step process:**
 - Open Tableau and load your dataset.
 - Click on a new sheet.
 - Drag Product line → to Rows. Drag Payment → to Columns.
 - Drag Total → to Text (Ensure it shows SUM(Total)).
 - Drag Total again → to Color.
 - Go to Show Me → Highlight Table.
 - Rename the title to: PAYMENT METHOD-WISE SALES BY PRODUCT LINE

WORD CLOUD:

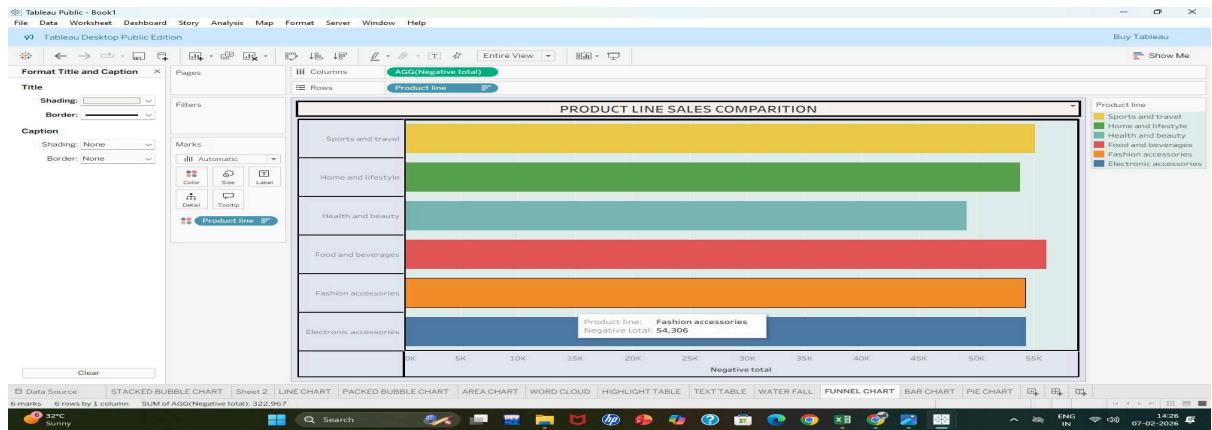

- **Purpose:** This word cloud shows product lines based on their sales volume. It helps quickly identify which product categories have higher sales by displaying them in larger text
- **Step by step process:**
 - Open Tableau and load your dataset.
 - Click on a new sheet.
 - Go to Show Me → Click Word Cloud.
 - Drag Product line → to Text in the Marks card.
 - Drag Total → to Size and Color (Ensure it shows SUM(Total))
 - Rename the title to: PRODUCT LINES BASED ON SALES VOLUME

FUNNEL CHART:

- **Purpose:** This chart compares total sales across different product lines. It helps identify which product category has the highest and lowest sales performance.
- **Step by step process:**
 - Open Tableau and load your dataset.
 - Click on a new sheet.
 - Drag Product line → to Rows.

- Drag Total (or Negative Total if used) → to Columns (Ensure it shows SUM(Total) or SUM(Negative Total)).
- In the Marks card → choose Bar OR go to Show Me → Bar Chart.
- Rename the title to: PRODUCT LINE SALES COMPARISON

WATER FALL CHART:

- **purpose:** This waterfall chart shows how each product line contributes to the total cumulative sales. It helps understand the step-by-step increase in overall revenue from each category.
- **Step by step process:**
 - Open Tableau and load your dataset.
 - Click on a new sheet.
 - Drag Product line → to Columns. Drag Total → to Rows.
 - Right-click on SUM(Total) → Select Quick Table Calculation → Running Total.
 - In Marks card → Select Gantt Bar.
 - Drag SUM(Total) again → to Size.
 - Rename the title to: WATERFALL CHART
