

ASSIGNMENT 1

BEFORE STARTING THE ASSIGNMENT

- Open Tableau Desktop
- Click File → Open
- Select your dataset
- In Data Source tab, check data
- Click Sheet 1

★ BAR CHART (Product Line vs Total)

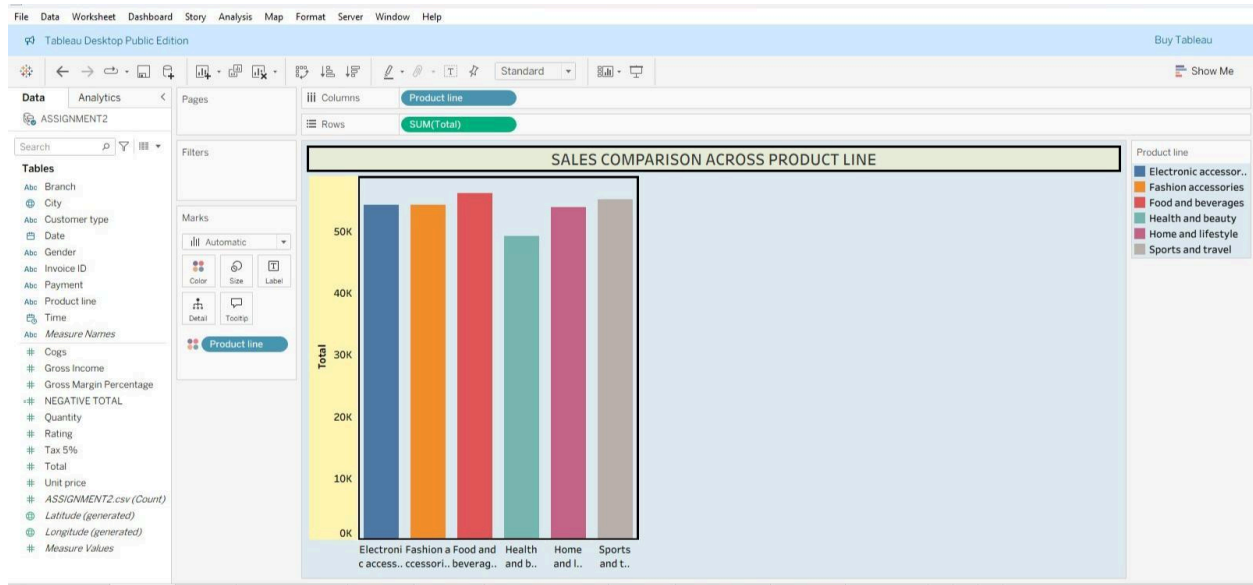

- **Purpose:**

To compare values between different categories.

Example: Compare sales of different product lines.

➤ Step by step process

- Click New Sheet
- Drag Product Line → Columns
- This creates category names at bottom.
- Drag Total → Rows
- This creates vertical axis.
- Keep Marks = Bar (default)
- Click Sort Descending
- Drag Total → Label

★ PIE CHART (Payment Distribution)

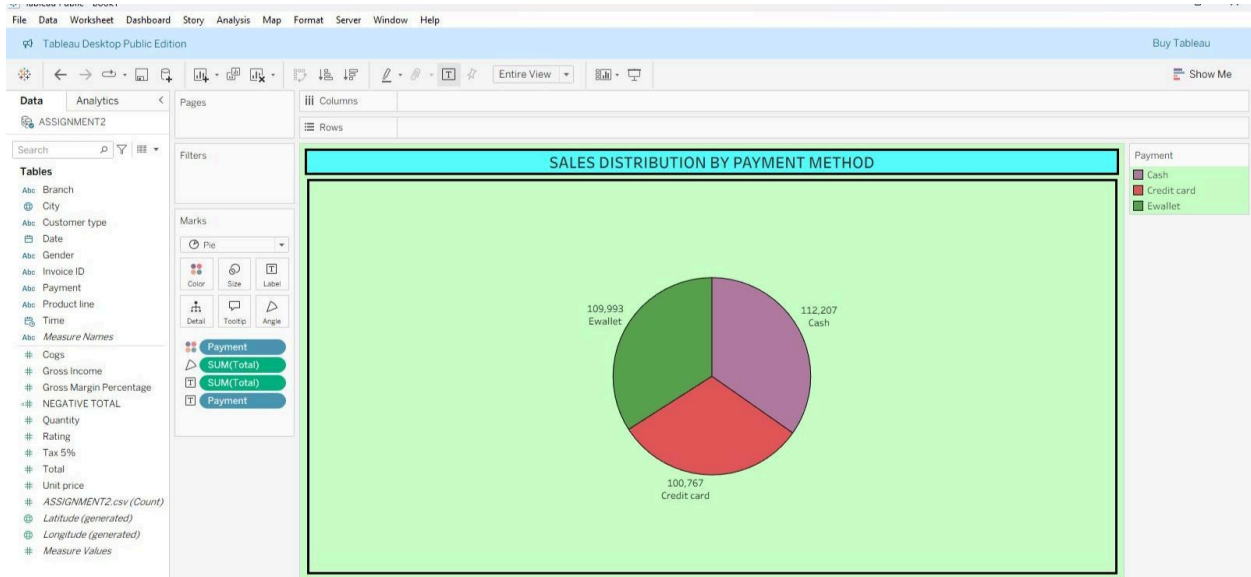

○ Purpose:

To show the percentage/share of each category in total.

Example: Payment method distribution.

➤ Step by step process

- Click New Sheet
- In Marks card, change Automatic → Pie
- Drag Payment → Color
- Drag Total → Angle
- Angle controls slice size.
- Drag Total → Label
- Increase Size slider

★ STACKED BAR CHART (Branch by Payment)

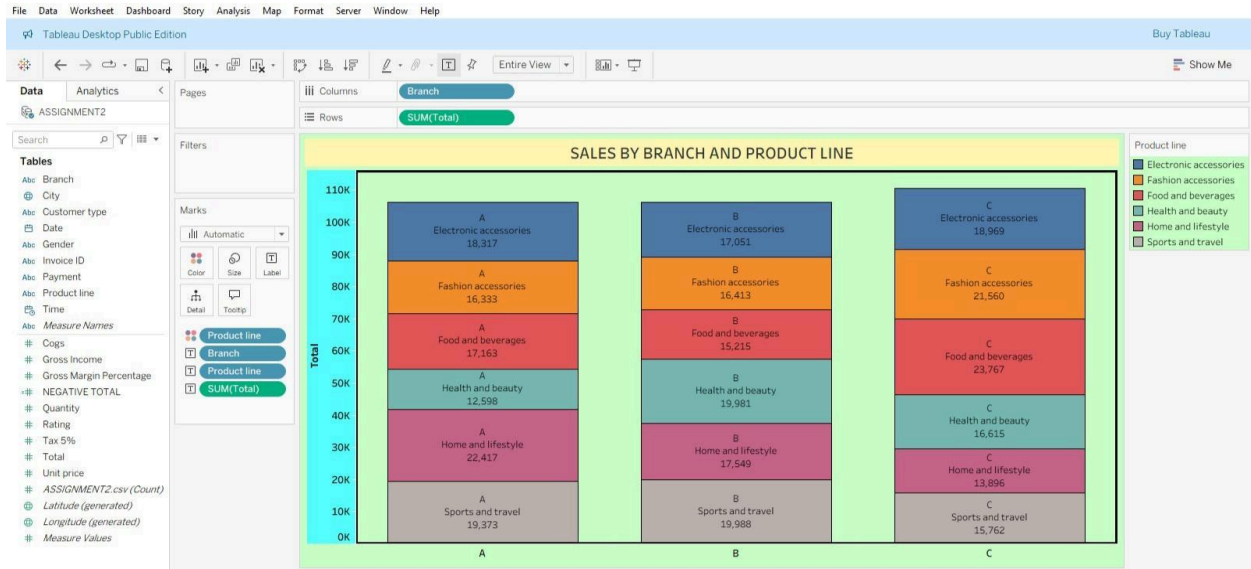

○ Purpose:

To compare categories and also see their internal breakdown.

Example: Branch sales divided by payment types.

➤ Step by step process

- Click New Sheet
- Drag Branch → Columns
- Drag Total → Rows
- Drag Payment → Color
- Go to Analysis → Stack Marks → On
- Drag Total → Label

★ LINE CHART (Monthly Sales Trend)

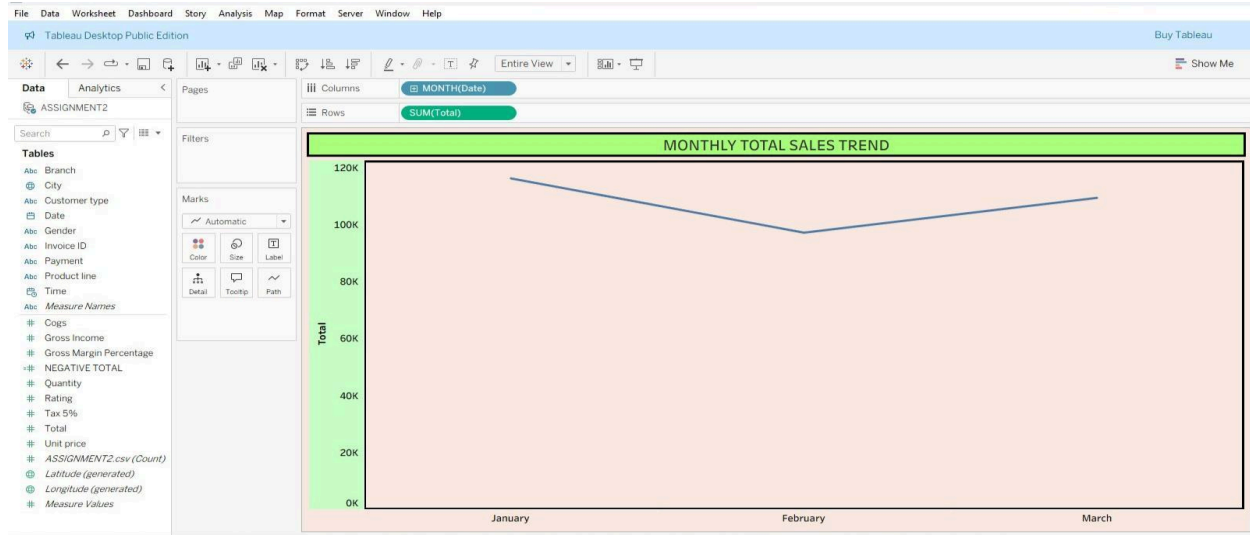

○ Purpose:

To show trend over time.

Example: Monthly sales growth.

➤ Step by step process

- Click New Sheet
- Drag Date → Columns
- Click Date dropdown → Select Month
- Drag Total → Rows
- Change Marks → Line

★ BUBBLE CHART

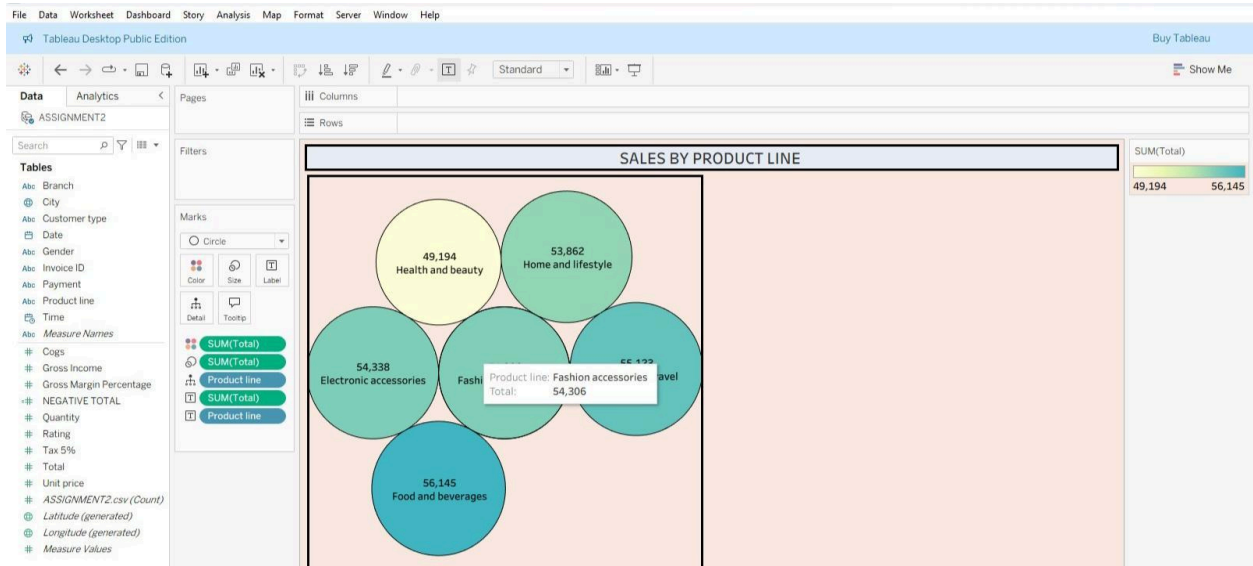

○ Purpose:

To compare values using size visually.

Bigger bubble = bigger value.

➤ Step by step process

- Click New Sheet
- Change Marks → Circle
- Drag Product Line → Detail
- Drag Total → Size
- Drag Total → Color
- Drag Product Line → Label

ASSIGNMENT 2

★ DONUT CHART

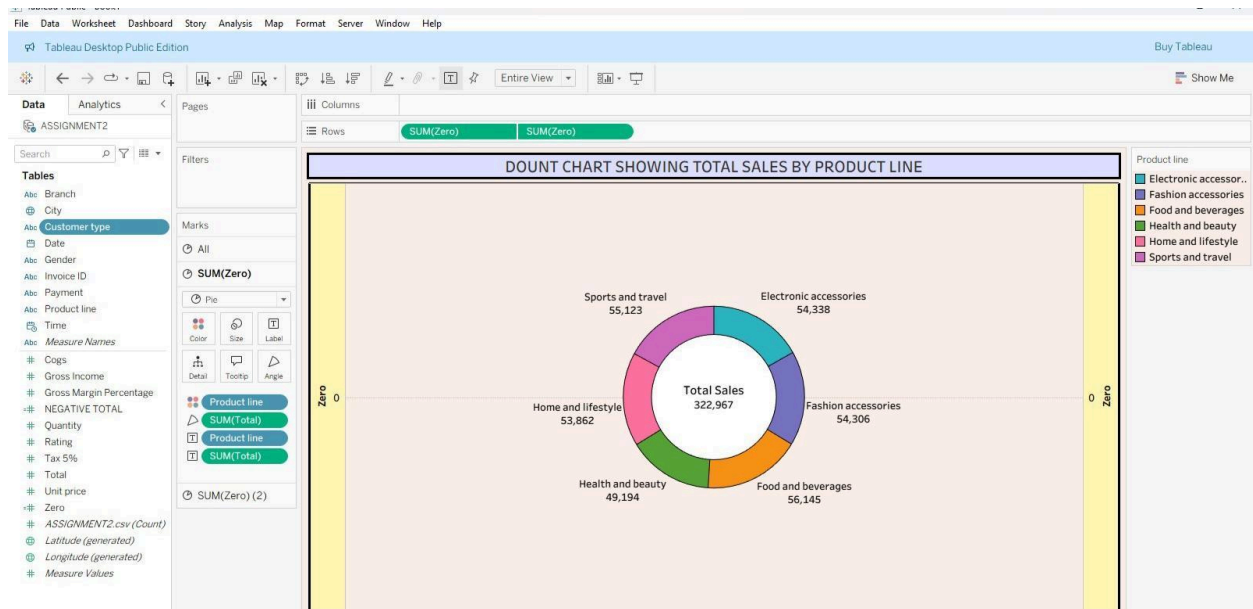

○ Purpose:

Same as pie charts but more visually attractive.

Used for showing percentage distribution.

➤ Step by step process

- First create Pie chart (same steps as Pie)
- Drag Total again → Rows
- Right-click second axis → Dual Axis
- Click second Marks card
- Change it to Circle
- Remove color
- Reduce Size

★ AREA CHART

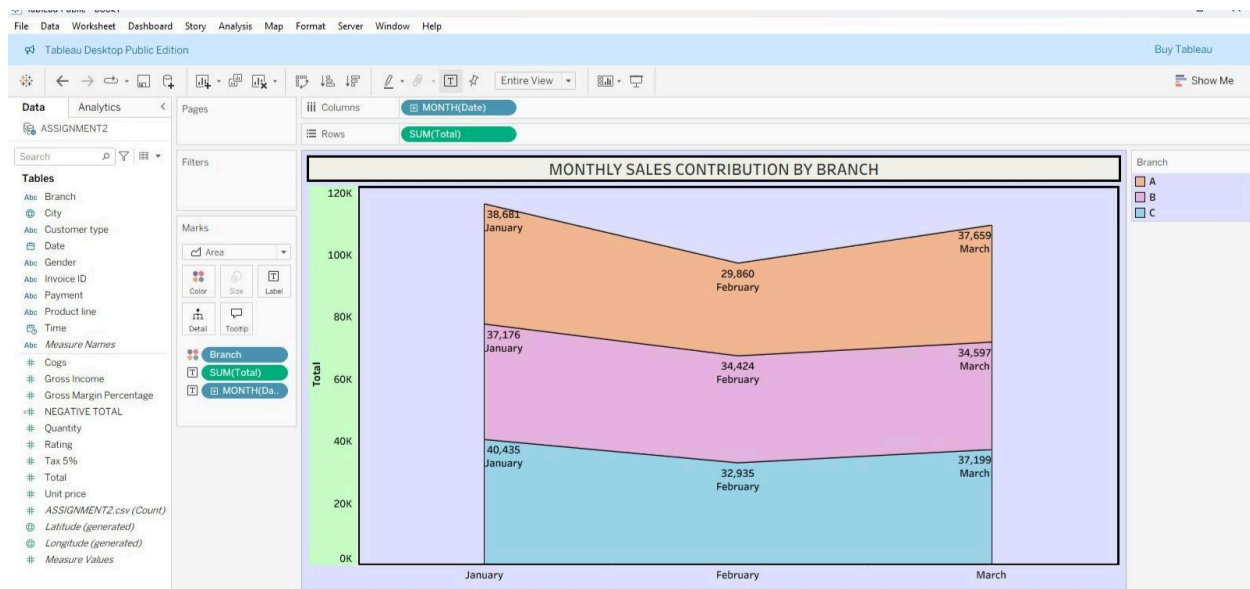

○ Purpose:

To show trends with volume emphasis.

Shows growth with a filled area.

➤ Step by step process

- Click New Sheet
- Drag Date → Columns
- Select Month
- Drag Total → Rows
- Change Marks → Area

★ TEXT TABLE

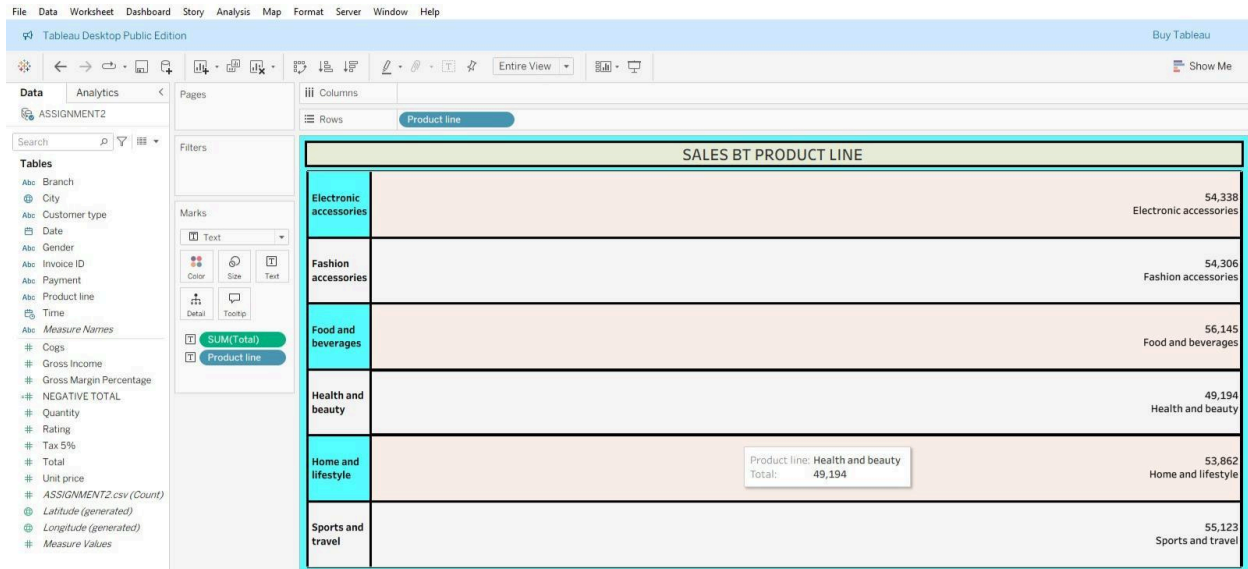

○ Purpose:

To display exact numbers clearly.

Used when precise values are needed.

➤ Step by step process

- Click New Sheet
- Drag Branch → Rows
- Drag Total → Text (Marks card)

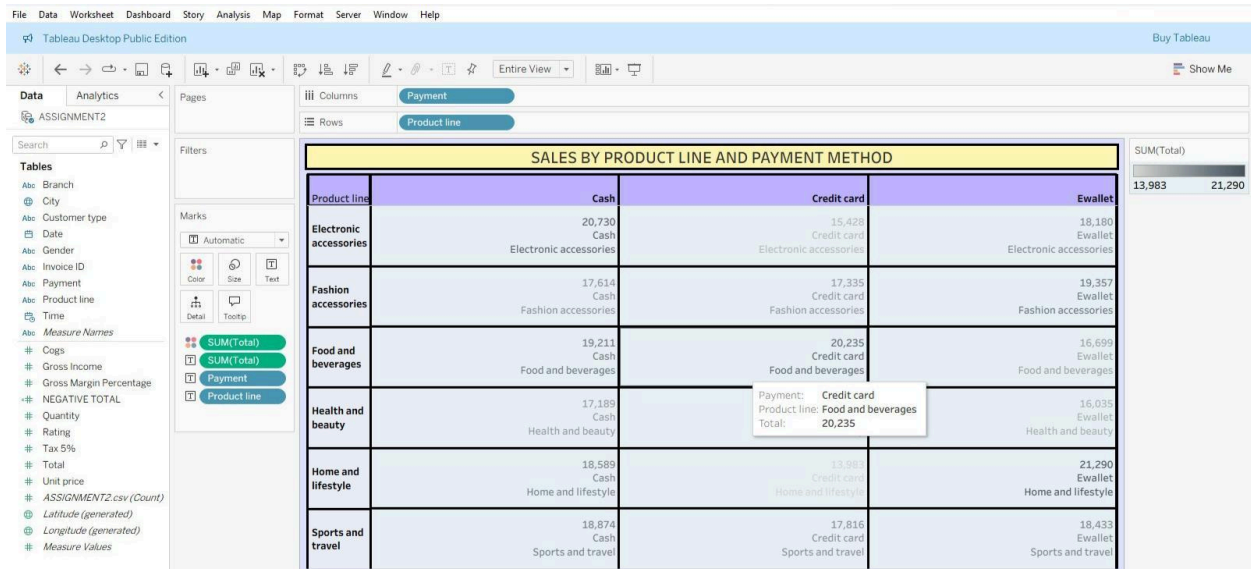

★ HIGHLIGHTED TABLE

○ Purpose:

To compare values using color intensity. Darker color = higher value.

➤ Step by step process

- Click New Sheet
- Drag Product Line → Rows
- Drag Branch → Columns
- Drag Total → Color
- Drag Total → Label
- Change Marks → Square

★ WORD CLOUD

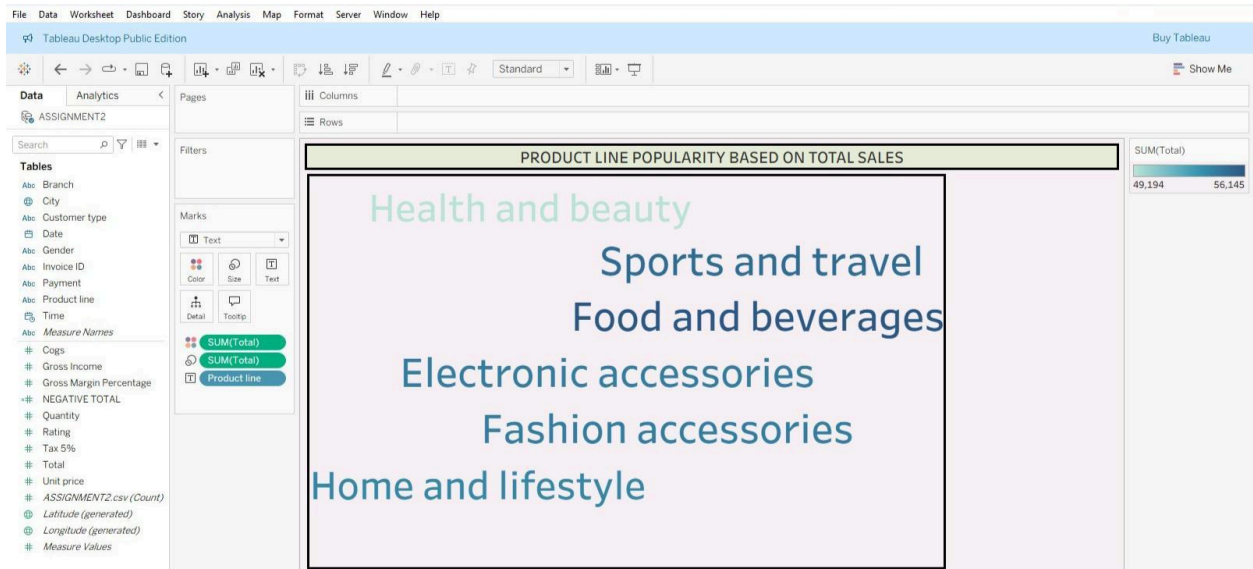

○ Purpose:

To visually show importance using size.

Bigger word = higher value.

➤ Step by step process

- Click New Sheet
- Change Marks → Text
- Drag Product Line → Text
- Drag Total → Size
- Drag Total → Color

★ FUNNEL CHART

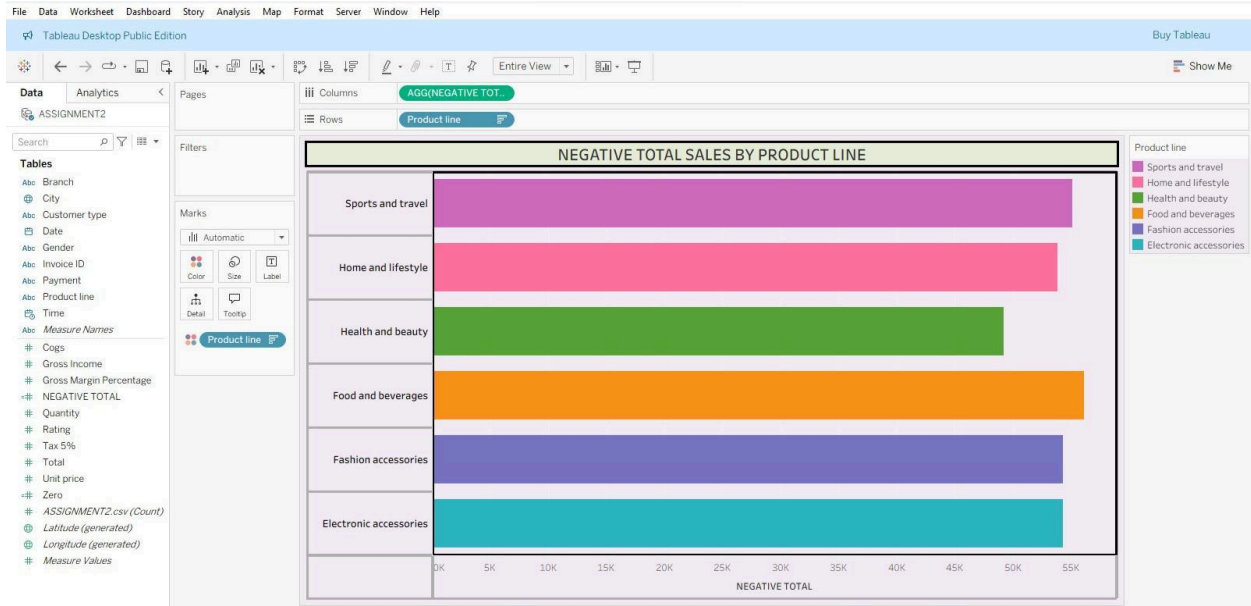

○ Purpose:

To show step-by-step reduction or ranking.

Used in the sales process or category comparison.

➤ Step by step process

- Click New Sheet
- Right-click → Create → Calculated Field
- Name: Funnel
- Formula:
-SUM([Total])
- Click OK
- Drag Product Line → Rows
- Drag Funnel → Columns
- Change Marks → Bar
- Click Sort
- Hide header

★ WATERFALL CHART

○ Purpose:

To show cumulative effect of values.

Shows how each category adds to the total.

➤ Step by step process

- Click New Sheet
- Drag Product Line → Columns
- Drag Total → Rows
- Right-click Total → Quick Table Calculation → Running Total
- Change Marks → Gantt Bar
- Drag Total → Size
