

Project Design Phase-II
Data Flow Diagram & User Stories

Date	31 January 2026
Team Id	LTVIP2026TMIDS36402
Project name	Heritage treasures: an in depth analysis of UNESCO world Heritage sites in tableau
Maximum marks	4Marks

Data Flow Diagrams:

The Data Flow Diagram (DFD) for the “*Heritage Treasures*” project shows how data about **UNESCO World Heritage Sites** flows through the system. The data is collected from the UNESCO dataset, processed and organized in Tableau, and then displayed as interactive dashboards.

Users apply filters such as country, region, and heritage type, and the system processes the input to generate updated charts and maps. The DFD clearly represents how data enters, is processed, stored, and presented for analysis.
